README.rst

pandas-datareader

Up to date remote data access for pandas, works for multiple versions of pandas.

pypi v0.4.0 downloads 0/month build failing coverage 85% docs latest health 95%

Installation

Install latest release version via pip

```
$ pip install pandas-datareader
```

Install latest development version

```
$ pip install git+https://github.com/pydata/pandas-datareader.git
```

or

```
$ git clone https://github.com/pydata/pandas-datareader.git
$ python setup.py install
```

Usage

Starting in 0.19.0, pandas no longer supports `pandas.io.data` or `pandas.io.wb`, so you must replace your imports from `pandas.io` with those from `pandas_datareader`:

```
from pandas.io import data, wb # becomes
from pandas_datareader import data, wb
```

Many functions from the data module have been included in the top level API.

```
import pandas_datareader as pdr
pdr.get_data_yahoo('AAPL')
```

See the [pandas-datareader documentation](#) for more details.
